

# Metal Progress

January-June 1980, Vol 117, No. 1-7

## Subject Index

In the index listing for each article, the first number indicates the issue number, the second number the page in that issue. Issue numbers are 1, January; 2, February; 3, Testing & Inspection Buyers Guide and Directory (not indexed); 4, March; 5, April; 6, May; and 7, June. All datasheets are listed under the heading "Datasheets."

### Aerospace

- Challenges in Aerospace Materials and Processes During the 80's, by Harry E. Chandler .....4-41
- A Corrosion Preventive Compound for Aerospace, by Gabriel J. Pilla and John J. DeLuccia .....6-57

Three Recent Developments in Titanium Alloys, by Wayne A. Reinsch and Harry W. Rosenberg .....	4-64

(Continued on next page)

Cannon "Half-Round" Ingots being charged in the induction furnace at Bescast, Inc.

## State of the art excellence...and a 20% increase in production.

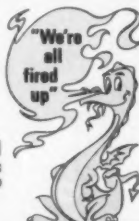

Hard to believe, but these are the results Bescast, Inc. is getting with Cannon-Muskegon "Half-Round" ingots. Because they're designed to fit compactly within the coil envelope, it is possible to load more alloy than would be the case if conventionally shaped ingots were used. And, more efficient inductive power transfer is achieved resulting in 20% less melt-down time.

With Cannon-Muskegon "Half-Rounds" you can forget about ingot shrinkage problems, too. Rarely are voids present to collect dirt and other contaminants. There's no weight guessing either. The 10# "Half-Rounds" are cast at a one-inch/one-pound ratio.

Give your castings a head start. Specify Cannon-Muskegon alloys—vacuum and airmelt, shot and ingot. From a few grams to 8,500 pounds.

**CANNON-MUSKEGON CORPORATION**  
BOX 506 MUSKEGON, MICHIGAN 49443

and John H. Smith .....3-38  
The Next 20 Years in  
Materials and Process  
Engineering, by Harry E.  
Chandler .....4-41  
New Fractographic Technique  
Maps Fracture Modes, by  
A. Madeyski .....3-54  
Nondestructive Testing in the  
80's, by Harold Berger .....3-33  
Selecting and Using a  
Commercial Laboratory, by  
David Krashes .....6-42
- Titanium**  
Optimizing Thermomechanical  
Processing of Ti-10V-2Fe-3Al  
Forgings, by George W. Kuhlman  
and Thomas B. Gurganus .....2-30
- Tour Guides**  
Metal Progress Tour Guide:  
Preview — 1980 Materials &  
Processes Show and Congress .....5-97
- Welding and Joining**  
The Next 20 Years in Materials  
and Process Engineering, by  
Harry E. Chandler .....4-66

## Author Index

- Averbach, B. L. ....8-19  
Banerjee, Bani R. ....6-58  
Berger, Harold .....3-33  
Chandler, Harry E. ....2-9, 3-9, 4-13,  
4-32, 5-9, 5-24,  
6-9, 6-21, 8-9,  
8-34  
Coyne, James E. ....6-34  
Dilloff, Neil J. ....3-61  
Dobson, Wilson G. ....3-61  
Du Mond, T.C. ....6-28, 8-30  
Eiselstein, Herbert L. ....8-11  
Fields, Richard J. ....3-38  
Gatslick, Harold B. ....3-61  
Gray, Allen G. ....2-21, 3-29,  
4-29, 5-17,  
6-17, 8-17  
Gurganus, Thomas B. ....2-30  
Hubbard, John D. ....2-46  
Jones, Larry .....2-54  
Keeler, Stuart P. ....2-25  
Krashes, David .....6-42  
Kuhlman, George W. ....2-30  
Madeyski, A. ....3-54  
Mattox, John E. ....2-36  
Mumford, Paul M. ....3-46  
Rothermel, Rodman S. ....8-40  
Smith, John H. ....3-38  
Vos, Eddie .....8-26
